

What part of \$42.5 billion does your company own?

*In 2000, the cost of work related injuries was \$42.5 billion nationally.
2003 Liberty Mutual Index*

Ergo Path Finder

**Be proactive...
Stop hurting your bottom line!**

Ergo Path Finder
is an easy-to-use software that guides the user towards the right ergonomic tool for the task.

- Designed for **quick and easy use** by both novices and experts in ergonomics and other related fields.
- **Realistic illustrations and clear descriptions** guide the user along the correct path for the task analysis.
- **Removes subjectivity** in analysis and guides all users to the same tool given the task parameters.

Conduct an **ergonomic task analysis** such as:

- Pushing and Pulling
- Lifting and Lowering
- Carrying
- Hand Intensive Work
- Repetitive and Forceful Exertions
- Metabolic Analysis

Includes commonly used, **published tools and references**, such as:

- Liberty Mutual Tables
- NIOSH Lift Equation
- RULA
- Strain Index
- Metabolic Equations

Print a professional summary of analysis results.
